

RUCKUS Customer Success for hospitality

Supporting and empowering lodging property networks

SERVICE OVERVIEW

Tools and support to help you succeed through your RUCKUS® journey

- 24/7 support: Responsive and knowledgeable support teams to empower your network management
- Professional services: Partner with RUCKUS-authorized resellers to deliver expert network solutions and optimized performance
- RUCKUS training: Unlock the potential in YOU and become an expert
- Online resources: Discover a multitude of ways to solve any issue
- Partner network: Find local experts to help order, deploy and manage your networks

RUCKUS Customer Success support is committed to helping you get the most from your RUCKUS Networks investment. We offer a number of support services, such as comprehensive training programs, professional services, robust online documentation, and community engagement forums to help you maximize your products' usage and achieve your business goals. Additionally, our support group is always available to assist you with any questions or challenges you may encounter.

With Customer Success, you've not only got professional experts with relevant hospitality experience ready to help; you also have access to a suite of resources designed to support your long-term success. At RUCKUS Networks, you can count on us to pair your property needs with the right specialist or resource. We can make your smart buildings even smarter.

Choose the support that meets your needs

Whether you manage a wireless network for an intimate boutique hotel or an international chain of resorts, we offer an array of service levels to address your property needs. Depending on the level of service selected, an experienced RUCKUS engineer with firsthand knowledge of hospitality challenges will be available via forums, emails, text messages or onsite to provide you with responsive, knowledgeable assistance that can help make your lodging's network run more smoothly.

- **WatchDog™ Support:** This base-level support offering is ideal for most customers and provides a strong foundation of support capabilities, including 24/7 technical assistance, software updates and major upgrades, as well as hardware replacement options. WatchDog Support is automatically included with the purchase of RUCKUS One®. ICX® Switches require additional support purchase.
- **BullDog™ Support:** This enhanced service offering is tailored for mission-critical networks in complex environments. In addition to the WatchDog services, it delivers a more personalized, proactive support experience that can provide insight into the health and operation of a network, including a Customer Success manager (CSM) to coordinate RUCKUS resources with your dynamic business needs. An onsite support engineer (OSE) is available as an add-on for those intricate networks that must provide always-on connectivity.

- **Partner Support:** For customers who prefer support from a local Partner, RUCKUS also offers high-quality, professional and responsive worldwide technical assistance from support engineers who have been trained and certified on RUCKUS Networks products. With Partner Support, customers can engage directly with RUCKUS-authorized Partners, while RUCKUS offers behind-the-scenes support to Partners and customers, including online access to product information, technical documentation, software downloads, and community forums.

Professional Services

[RUCKUS Professional Services](#) brings exceptional value to hospitality properties by leveraging their deep networking expertise and comprehensive suite of resources. Their services help enterprises get the most out of their network investments through tailored solutions, extensive training programs, and robust online documentation.

From site audits and advanced configuration recommendations to [meticulous design evaluations with 3-D simulations](#), Professional Services offers end-to-end support so your network meets key performance indicators (KPIs), enhances guest experiences and operates efficiently throughout your property.

Moreover, we offer a variety of specialized services—including seamless internet of things (IoT) integration, systems controller migration or network analytics, as well as [Cloudpath® Enrollment System White Glove Service](#)—to help install and configure our secure, state-of-the-art onboarding system. Visit [this link](#) to learn more about how RUCKUS Professional Services can solve your smart city network challenges.

To learn how our team of experts can help you design, deploy, and optimize your network for maximum performance and efficiency, contact your RUCKUS account manager or [email us](#).

Training

RUCKUS training and certifications play a crucial role in enhancing hospitality properties by equipping IT staff with the necessary skills and knowledge to manage and optimize advanced networking solutions. Through a comprehensive portfolio of free and paid eLearning, accreditations, and classroom training, RUCKUS

helps enterprise IT teams become more proficient in designing, implementing, managing, and supporting RUCKUS solutions. This expertise allows properties to integrate IoT devices and systems effectively, reduce utility and facilities costs, improve on-site safety, and provide seamless connectivity.

RUCKUS Education Services offers technical courses in a variety of formats, including on-demand eLearning training, remote instructor-led training (virtual class), and dedicated private instructor-led training (classroom or virtual class). For example, our [Hospitality and MDU Webinar Series](#) delivers a foundational understanding of wired, wireless and software component architectures commonly used in high-density networks. A list of available training courses can be found on the [RUCKUS education learning portal](#).

Online resources

RUCKUS also offers a number of general and member-access web resources regarding ordering, configuration, troubleshooting, product features and functionality. Bookmark these addresses below for easy access in the future.

[RUCKUS Technical Family \(RTF\)](#)

RTF is more than a community. We welcome all networking technology enthusiasts who want to keep up with the latest innovations and apply them in real-world networking solutions. Check out our webinars, blog posts and more!

[RUCKUS Community forums](#)

Ask a question and get help from your peers and RUCKUS experts. If you have questions to ask, problems to report, or other feedback to give, you've come to the right place. Our team does our very best to help as fast as we can.

[RUCKUS support portal](#)

Gain access to license management, knowledge base articles, means to contact support, and much more. This portal provides a great federated search function that will bring up knowledge base articles, data sheets, and forum posts all in one spot!

[CommScope online documentation](#)

Find RUCKUS technical documentation in HTML format.

[RUCKUS Customer Success webinars](#)

RUCKUS hosts a series of monthly webinars on topics regarding our subscription products and best practices for our products, all with live Q&A. Join us!

[RUCKUS Education Services YouTube channel](#)

Our RUCKUS Education Services channel has tons of great videos to help answer questions and train new users.

[RUCKCast® podcasts](#)

RUCKUS experts offer bi-weekly chats on Wi-Fi® and computer networking, featuring insider insights and special guests discussing RUCKUS Networks products.

Partner network

RUCKUS is proud to offer an extensive [network of Channel Partners](#) around the globe who are ready to help you build and maintain the perfect Wi-Fi network for your lodging properties—many of whom have hands-on experience in the hospitality field. We also encourage you to visit our growing community of [Alliance Partners](#) who can help you make the most of your hospitality wireless network.
