

RUCKUS Customer Success for Pro AV integrators

Supporting and empowering high-performance networks

SERVICE OVERVIEW

Tools and support to help you succeed through your RUCKUS® journey

- 24/7 support: Responsive and knowledgeable support teams to empower your network management
- Professional services: Partner with RUCKUS-authorized resellers to deliver expert network solutions and optimized performance
- RUCKUS training: Unlock the potential in YOU and become an expert
- Online resources: Discover a multitude of ways to solve any issue
- Partner network: Find local experts to help order, deploy and manage your networks

RUCKUS Customer Success support is committed to helping you get the most from your RUCKUS Networks investment. We offer a number of support services, such as comprehensive training programs, professional services, robust online documentation, and community engagement forums to help you maximize your products' usage and achieve your business goals. Additionally, our support group is always available to assist you with any questions or challenges you may encounter.

With Customer Success, you've not only got skilled experts with relevant professional AV experience ready to help; you also have access to a suite of resources designed to support your long-term success. At RUCKUS Networks, you can count on us to pair your business needs with the right specialist or resource. We make your smart homes even smarter.

Choose the support that meets your needs

Whether you manage a wireless network for a private conference room or a palatial residential estate, we offer an array of service levels to address your network needs. Depending on the level of service selected, an experienced RUCKUS engineer with first-hand knowledge of Pro AV challenges will be available via forums, emails, text messages or onsite to provide you with responsive, knowledgeable assistance that can help make your elite networks run more smoothly.

- **WatchDog™ Support:** This base-level support offering is ideal for most integrators and provides a strong foundation of support capabilities, including 24/7 technical assistance, software updates and major upgrades, as well as hardware replacement options. WatchDog support is automatically included with the purchase of RUCKUS One®. ICX® Switches require additional support purchase.
- **BullDog™ Support:** This enhanced service offering is tailored for mission-critical networks in complex environments. In addition to the WatchDog services, it delivers a more personalized, proactive support experience that can provide insight into the health and operation of a network, including a Customer Success manager (CSM) to coordinate RUCKUS resources with your dynamic business needs. An onsite support engineer (OSE) is available as an add-on for those intricate networks that must provide always-on connectivity.

- **Partner Support:** For integrators who prefer support from a local resource, RUCKUS also offers high-quality, professional and responsive worldwide technical assistance from support engineers who have been trained and certified on RUCKUS Networks products. With Partner Support, Pro AV installers can engage directly with RUCKUS-authorized Partners, while RUCKUS offers behind-the-scenes support to Partners and customers, including online access to product information, technical documentation, software downloads, and community forums.

Professional services

[RUCKUS Professional Services](#) brings exceptional value to Pro AV smart homes or enterprises by leveraging their deep networking expertise and comprehensive suite of resources. Their services help customers get the most out of their network investments through tailored solutions, extensive training programs, and robust online documentation.

To learn how our team of experts can help you design, deploy, and optimize your network for maximum performance and efficiency, contact your RUCKUS account manager or [email us](#).

Training

RUCKUS training and certifications play a crucial role in enhancing professional AV deployment by equipping your staff with the necessary skills and knowledge to manage and optimize advanced networking solutions. Through a comprehensive portfolio of free and paid eLearning, accreditations, and classroom training, RUCKUS helps integrators become more proficient in designing, implementing, managing, and supporting RUCKUS solutions. This expertise allows your team to integrate IoT devices and systems effectively, which can reduce utility costs, improve security, and provide seamless connectivity.

RUCKUS Education Services offers technical courses in a variety of formats, including on-demand eLearning training, remote instructor-led training (virtual class), and dedicated private instructor-led training (classroom or virtual class). For example, the [RUCKUS course curriculums](#) deliver a foundational understanding of wired, wireless and software component architectures commonly used in home and enterprise networks. A list of available training courses can be found on the [RUCKUS education learning portal](#).

Online resources

RUCKUS also offers a number of general and member-access web resources regarding ordering, configuration, troubleshooting, product features and functionality. Bookmark these addresses below for easy access in the future.

[RUCKUS Technical Family \(RTF\)](#)

RTF is more than a community. We welcome all networking technology enthusiasts who want to keep up with the latest innovations and apply them in real-world networking solutions. Check out our webinars, blog posts and more!

[RUCKUS Community forums](#)

Ask a question and get help from your peers and RUCKUS experts. If you have questions to ask, problems to report, or other feedback to give, you've come to the right place. Our team does our very best to help as fast as we can.

[RUCKUS support portal](#)

Gain access to license management, knowledge base articles, means to contact support, and much more. This portal provides a great federated search function that will bring up knowledge base articles, data sheets, and forum posts all in one spot!

RUCKUS and professional AV

RUCKUS Networks has a history of helping businesses build and maintain the most robust and reliable networks across the globe. Our smart home and enterprise technologies help elevate a residential or commercial location by enhancing end-to-end AV over IP compatibility, user experiences, and operational efficiency. Moreover, by integrating internet of things (IoT) devices and systems, we allow your customers to get the most from their network while reducing utility costs, improving on-site safety, and providing seamless connectivity and services that make their environment remarkable.
